#### REFERENCE AND RECOMMENDATION FOR ZSÓFIA CSÁGOLY

I got to know Zsófia Cságoly as she started to prepare for her master's thesis at the Environment and Natural Resources in 2013. I became her supervisor in her master's thesis and she also took one course I teach at a graduate level.

During her studies Zsófia also worked as my assistant in a research project I steered. The work was very demanding, both mentally and physically as she had to gather as many answered questionnaires from tourists as possible at the various destinations in Iceland in all seasons (summer, autumn and winter).

Zsófia graduated in 2015 with a very good thesis. It was so good that we are now working on a scientific paper, which builds upon her thesis so our cooperation has continued after she graduated. The paper has been accepted with some changes and will be published soon.

I therefore got to know Zsófia through her studies and through her work. Zsófia is very focused and determined in the matter she put her task upon and finishes what she aims at. She works very well and is very conscientious. She is ambitious and her capability to work independently is very good as well as working in a group with others. Zsófia showed keen interest in the subject of tourism and her grades are first-rate. It is with a pleasure that I give her my best recommendations.

Sincerely

Anna Dóra Sæþórsdóttir
